ABOUT SCOREVEN

Trillions of conversations happen every day and if there was a way of recording them all, you would see that most of these conversations are very mindlessly pursued as is evident in their repetitive nature.

To recall any conversation, wit serves as an identifier because routine, boring conversations and presentations are tough to recall because 'too much said is met with too much ignored'. Wit is a learnable skill, which is perhaps the one most ignored amongst all the skills available to a person.

We, at Scoreven, have mastered the art of infotainment, wherein we not only provide interesting and humorous content tailor-made to the genre of the Influencer but also give valuable information to their audiences to enable them to change their lives for the better. Trust us to create valuable content for you to share with your audience and provide you with our shoulder's height to enable you to see far into the future.

PREFACE

About Trust, the one thing that can be said with certainty is 'You are credible in the eyes of those who are incredible in yours'.

In this time and age, the one emotion that is in the most deficit the world over, it is Trust. It is such a serious subject that it is not even funny but that is where we found our challenge. We created these one liners which have wit on one side of the border and wisdom on the other, and the border represent the trust we have that you'll like what is written in this e-book. Now that is a self-deprecating joke because there is no better way to build credibility than beginning by telling it.

Trust takes time to build. It is like Rome, or your Home in which your parents, wife and/or children can always find something to improve. So get acquainted to the finer aspects of building trust in this environment in which losing trust is ordinary and building trust is extra-ordinary.

Jokes apart, Trust is the credit card that the banks give you in the hope that you'll not pay your bills in time. A few lines on Trust, the kinds of which you can expect in the e-book.

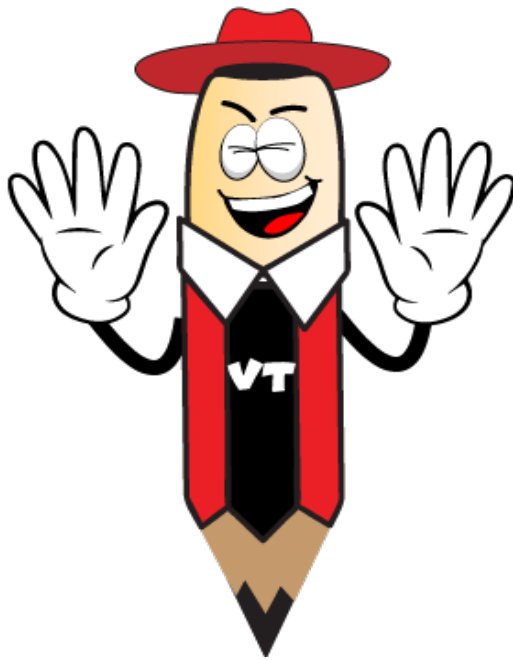

Trust is that airplane for which to fly, the passengers have to be subject to an insecurity check. Trust is an asset that keeps on giving. So it is in your interest to keep the scam going.

If i write any more on Trust, you would know all my secrets in building trust with my readers, so I stop here.
